PART.82 IT'S ALWAYS BEEN LIKE THIS...

«What is SEX to men?»

- ① A physiological occurrence discharging excessive material from inside the body
- ② A base need or life that cannot be ignored, like eating
- ③ A lacking of security: to be able to lay his face between a woman's breasts
- ④ A comfortable way of exercise, to sweat it off
- ⑤ To confirm his love, fulfill his lust, and the pleasure of circulating
- ⑥ SEX is to accompany each other
- ⑦ Enable him to ease off work-stress and tension

SEATED
POSITIONS

① FRONT SEATED POSITION (face-to-face position)

The 'Seated Position' is a position that doesn't give as much pleasure as other positions. However, the female can take the opportunity to adjust her body and spread her legs wider to have a deeper penetration. Also, both of the couple can cross each other with their hands, thus increasing the love atmosphere. ♡

From "Man and Woman"
(Penguin Editorial)

HM~
AH!!

The Front Seated Position puts the least burden on the couple, from among these positions. It's a position that forms a hugging posture, thus increasing the feeling of security for women ♡

It's definitely a position that shows the love between the couple.♡

The **Back Seated Position** allows the man to control the breasts and clitoris from behind.

EVERY DAY TO
BUY THIS!

WE'LL TALK TO

EVERY CONTRACEPTIVE WAY THERE IS!

① BASIC BODY TEMPERATURE METHOD

Record the ovulation days using the ranges of body temperature. Don't have SEX 5 days before and after the ovulation.

VERY PROBABLY...
NONE... AND CAN
GET PREGNANT
EASILY!

② RHYTHM METHOD

From 12 to 16 days before menstruation are vulnerable days, and the previous days are safe.

14 days to 20 days earlier / after Cycle Span
(http://www.mpsj.com/eng/edu/Spans/Spans)

NOT VERY RELIABLE
BECAUSE PERIODS
DON'T ALWAYS
COME ON TIME

③ COITUS INTERRUPTUS

Quickly take out the penis at the moment of ejaculation. Very commonly seen in A/Vs, where the man ejaculates on the woman's body.

THERE'S A SMALL AMOUNT
OF LIQUID REMAINING ON
EJACULATION, SO THIS
DOESN'T WORK EITHER!

④ WASHING METHOD

Wash the vagina immediately after ejaculation. Methods ①~③ have low success rates of contraception.

SPERMICIDICALLY DON'T TAKE LONGER
TO 5 MINUTES TO REACH THE UTERUS...
PERHAPS, WHEN YOU GET TO THE BATH-
ROOM, YOU WILL ALREADY BE PREGNANT!

⑤ CONDOM

Quite a popular method, convenient for men because it can be bought almost anywhere.

PERHAPS A FEMININE CONDOM
WILL BE RELEASED SOMETIME...

Pls Note: There already exists female condom (female condom) (http://www.mpsj.com/eng/edu/Condom/Condom)

⑥ PESSARY

Contraceptive method a woman can do herself. Insert the rubber device into the entrance of the uterus to act as a cap.

THOUGH LIKE NOT
MANY PEOPLE USE IT
TODAY DAYS... IT
FALLS OFF EASILY!

⑦ SPERMICIDE (LIKE KYLINDOL)

A convenient contraceptive method for women to carry around.

YOU CAN GET THEM AT
PHARMACIES... BUT IT'S
BARELY RECOMMENDED
TO USE IT

8 IUD (INTRA-UTERINE DEVICE)

Place a plastic device inside the uterus. Not commonly used among Japanese women, but almost 8 million women around the world use it every year.

BUT WHEN YOU INSERT IT, IT HURTS, AND THERE'S THE POSSIBILITY OF GETTING PREGNANT OUTSIDE THE UTERUS.

9 CONTRACEPTIVE PILLS

Birth control machines in pill form. Hormonal evolution by adjusting hormone levels in the body. Low success rate if you forget to take the pills regularly, and might cost up to 5,000 yen per month. (Need doctor's prescription to buy it!)

IT CAN PREVENT PIMPLES AND ACNE! 100% ♡ BUT MIGHT CAUSE SIDE EFFECTS OF NAUSEA AND INCREASE HAIR GROWTH! ☆

10 OTHER METHODS

Other contraceptive methods that are not recognized in Japan are inserting hormone capsules under the skin, and injecting birth control medicine. Some women perform tubal ligation to prevent having children at all.

(Failure rates of birth control methods)

Pills.....0.1-0%
Condom.....2-14%
